PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/812,837	Applicant(s) MALONE, DAVID G.	
	Examiner Alvin J. Stewart	Art Unit 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 August 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Response to Arguments

Applicant's arguments with respect to claims 56, 58, 60, 62, 63, 65, 67 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21, 56, 63, 65 and 67 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation ‘wherein said port is defined by said end cap’ is unclear. The examiner does not understand the meaning of the wherein clause. The Applicant’s representative should substitute the phrase “defined by” by the phrase “located in”. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 62 is rejected under 35 U.S.C. 102(b) as being anticipated by Ray et al US Patent 5,026,373.

Ray et al discloses an interbody spine fusion comprising a body (10) defining an outside surface, a carrier receiving area (hollow section of element 10), implanting the bone implantable

Art Unit: 3774

device adjacent a target bone structure applying an un-doped sponge material (see col. 10, lines 9-12, the bone), a port (opening at extremities of element 10), and a pathway (13).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21, 56, 58, 60, 62, 63, 65, and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by Michelson US Patent 6,605,089B1.

Michelson discloses an interbody spine fusion comprising a body (130) defining an outside surface, a carrier receiving area (36), implanting the bone implantable device adjacent a target bone structure applying an un-doped carrier material, a port (opening closed by cap element 125), a pathway (142), an end cap (125) and a plug (120 & 122). The port is defined by the end cap. The plug is penetrated by a delivery device (196) (it delivers electric current).

Regarding claim 63, the plug is capable of being penetrated by a syringe. Claim 63 is a functional language claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3774

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 72 is rejected under 35 U.S.C. 103(a) as being unpatentable over Michelson US Patent 6,605,089B1.

Michelson discloses the invention substantially as claimed. However, Michelson does not disclose a syringe as a delivery device.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to modify the step of inserting biological active substances of the Michelson reference because Applicant has not disclosed that by having the above mentioned substance provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with Michelson reference because it would perform equally as well.

Therefore, it would have been an obvious matter of design choice to modify the Michelson reference to obtain the invention as specified in claim 72.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Isabella can be reached on 571-272-4749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
